Tomslin Samme-Nlar: awesome presentation

----- (02/21/2018 21:41) -----

Shahul Hameed: Thanks Jim, wonderful presentation. I've a got a question. How's the collective comments being co-ordinated within a constituency?

----- (02/21/2018 21:42) -----

Renata Aquino Ribeiro: questions leave interpretation margins, indeed.

Renata Aquino Ribeiro: no cut-throat intro

Renata Aquino Ribeiro: so good to see questions on queue :)

Renata Aquino Ribeiro: Jim, yes, I'll forward you via email

khoulood Dawahi: Mr @jim you said that IP justice 's public comment was ineffective in the beginning ,why ?

----- (02/21/2018 21:45) -----

Renata Aquino Ribeiro: we have claire, khoulood on queue

khoulood Dawahi: I didnt notice .Thank you renata

Renata Aquino Ribeiro: yes, how strongly we feel about a policy position also relates to our values

Renata Aquino Ribeiro: sure khoulood just keep our queue here vibrant which is really good

Renata Aquino Ribeiro: we have monthly policy committee call so yes, really good to think about these occasions

Renata Aquino Ribeiro: thanks jim

Renata Aquino Ribeiro: you can solicit other question now?

Shahul Hameed: Thanks Jim and Renata for the explanation.

Renata Aquino Ribeiro: claire?

ron wickersham: additional suggestion: read the working groups considerations of the comments -- the majority on the working group works hard to marginalize the impact of unwelcome comments.

Renata Aquino Ribeiro: sure
----- (02/21/2018 21:49) -----

Renata Aquino Ribeiro: these are great questions claire

Renata Aquino Ribeiro: penholder practice exercise suggestion :)
----- (02/21/2018 21:51) -----

Catarina Woyames: Really important! for me would be great the penholder practice exercise

Renata Aquino Ribeiro: khouloud and ron

Thato Mfikwe: How does ICANN or the board view or weigh a consensus policy position or comment from the community? If relevant.

Renata Aquino Ribeiro: yes Catarina. Our course is giving us great projects idea to move on.

Renata Aquino Ribeiro: Thato that's a great question

khouloud Dawahi: how to assess the effectiveness of a public comment ?
----- (02/21/2018 21:56) -----

Thato Mfikwe: Thanks.

Renata Aquino Ribeiro: go ahead khouloud

Renata Aquino Ribeiro: oops is this question jim read right?
----- (02/21/2018 21:59) -----

Thato Mfikwe: @Khouloud - One way to assess would be tracking during online and ICANN meetings, could be wrong.

ron wickersham: to assess the efficiveness of the public coment read the official response of the working group as they consider your comment.

khouloud Dawahi: @thato thank you very much thato

khouloud Dawahi: Thank you @ron

Farell FOLLY: To address effectiveness, ICANN must also set criteria first. Indeed a command can be pertinent but the WG decdides to not consider...
----- (02/21/2018 22:01) -----

Farell FOLLY: otherwise, all comments need to be considered equally whether they seem effective or not to the target

nvsathyasree: For those who are not able to physically participate at Puerto rico can we getto participate from distance in the training prog for pen holder. That will be very helpful.

Renata Aquino Ribeiro: yes, this course will have remote participation too

----- (02/21/2018 22:02) -----
